

Instructions

Bags of gold coins will drop from a helicopter. Try to catch as many as you can!

Bags of gold coins will drop from a helicopter. Try to catch as many as you can!

Use the keyboard to move your bucket left and right. The F and G keys move to the left, the H and J keys move to the right

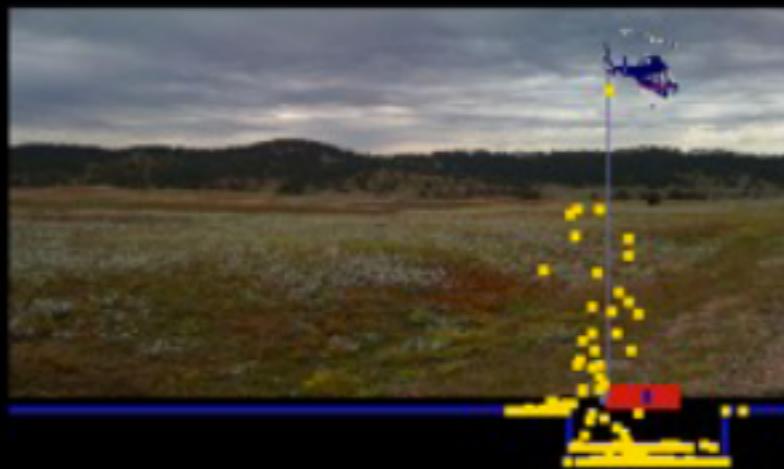

The bags will fall near the helicopter, but their exact position will be random. Your best strategy is to **keep the bucket directly under the helicopter**.

The helicopter usually stays in one place, but occasionally moves to a new location.

Each bag contains either gold or rocks. In the MRI scanner you will be paid for the gold you collect (25¢ per 500 coins).

Rocks are not worth any money. You have no way to tell whether each bag contains gold or rocks until it lands.

Give it a try!

Now the helicopter will be hidden by clouds. Everything else is exactly the same.

You should continue to keep your bucket directly under the helicopter even though you can no longer see it.

The screen will show you a red bar spanning the distance between your last bucket position and the last bag.

It ususally makes sense to choose a bucket position somewhere along the red bar

Occasionally the clouds will blow away and the helicopter will be revealed, making it easier for you to know where to put your bucket

Now you will have two blocks to practice
